

**15 NOVEMBER 2011**

Wasteman will be closing the gates to the acceptance of waste for disposal at its existing landfill site cells situated at Bulbul Drive, Chatsworth.

Wasteman committed to this closure in March 2011 as Cells 1, 2 and 3 have reached their airspace limitations. Wasteman has undertaken a Basic Assessment which includes for the Capping and Rehabilitation of this, in which all stakeholders have participated. Wasteman awaits the approval from the Authorities on the Capping and Rehabilitation plan.

Wasteman have advised all of our clients, of the closure. Wasteman has found alternative facilities for every waste stream at alternative permitted landfill facilities, treatment facilities or recycling centers, and will continue to provide an excellent service to all of its clients in KZN.

Wasteman have submitted a comprehensive and holistic Environmental Management Plan to the Authorities for approval, which details the on-going management and rehabilitation of the cells post closure.

However, Wasteman will continue in business from these premises. The only difference will be that no disposal of refuse will take place on the existing landfill footprint.

**VISION**

Wasteman Holdings strive to achieve synergy between the personal aspirations of our Employees, the needs of our Clients, value to our Shareholders, and responsibility to our Environment, through the provision of responsible, safe, innovative and sustainable solutions using the most up to date and appropriate technology.
