

## **A WARM WASTEMAN WELCOME TO 2012**

It is hard to believe that a year can pass so quickly and with so much achievement! Wasteman as a Group has used the festive season productively and has an exciting year planned ahead. We are only all too aware of the ongoing changes in business, and the even more stringent, legal requirements of efficient waste management.

Taking into account all these challenges, we have implemented a range of new and exciting initiatives, which will provide clients with competitive pricing, and legally compliant innovations for the transportation and disposal of waste management needs.

Our new web site has added a whole new dimension to business communication and we invite clients to visit the site and utilise this useful tool for communication with their region and quoting requests. However, if you still prefer the old-school method, simply give us a call and a company representative will address your needs.

We anticipate an exciting year ahead with many new milestones and exceptional achievement. We trust that you have used your down time to reflect, plan and rejuvenate for an exhilarating next twelve months, and that together we can achieve better efficiencies, implementation and execution of your waste management needs.

We personally commit to 110% effort in our efforts to achieving both our personal, internal goals, as well as customer objectives for notching up another year of success and achievement in the face of the challenges we can expect in the coming period.

Thank you for your ongoing support and commitment and Wasteman looks forward to sharing the rewards of another successful year with you.
